DETAILED ACTION

This office action is in response to a Response to a Restriction Requirement. Claims 41-85 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 41-82 and 84-85, drawn to a method and composition for treating cancer comprising administering a vector encoding p450 and acetaminophen.

Group II, claim 83, drawn to a method of treating cancer comprising administering acetaminophen.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature of the invention that meets the definition of a "special technical feature" or that contribution which each of the invention considered as a whole makes over the prior art can be considered to be a vector encoding p450 in combination with acetaminophen as the composition claims do not involve cell killing. Group II does not use the special technical feature.

MPEP 1875.01(d) states "If multiple products, processes of manufacture or uses are claimed, the first invention of each of the other categories related thereto will be considered as the main invention in the claims, see PCT Article 17(3)(a) and 1.476(c)."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maria B Marvich, PhD whose telephone number is (703) 605-1207. The examiner can normally be reached on M-F (6:30-3:00).
